

To whom it may concern,

My name is Naomi George and I am a 2nd year B.Tech student who has a keen interest in learning more about Computer Studies and Machine learning. My prime area of interest lies in the field of Machine Learning and Artificial Intelligence, in general and using Machine Learning techniques to solve real world applications by building concrete mathematical models in particular. I am also deeply interested in working towards general Artificial Intelligence which is the result of my fascination with Science Fiction. I am writing to apply for an opportunity to learn more about ML through internship at EPFL.

I hope to become someone who can be considered as an all-rounder and thus want to polish my skills more through your program. I'm sure I'm not half as good as others who are applying but I know that I'll be at a different level if I am given the opportunity. I have a lot of people in my life whom I have to prove but more than that I want to grow and glow in the choice I made.

I believe there's beauty in teaching a machine new things. My hope from this internship is that it would allow me to explore better and understand the topics of Machine Learning and Artificial Intelligence which has captivated me from childhood since I first read about JARVIS. Working with a research team will also give a taste of working on an actual research project and to contribute in my own small way.

Learning from your internship would help me develop my aptitude for computer programming and machine learning while playing with it. I am open to whatever experiences this internship would bring my way and hope I could achieve them through your programme. My biggest desire from the internship is the knowledge and the experience I will gain by working under the guidance of a mentor so I could further refine my own interests and work towards building a career along the way.

I am very grateful for the time you have taken to consider my application and look forward to hearing from you soon. Please do not hesitate to contact me at fiona18george@gmail.com if you have any questions about my application.

Kind Regards,

Naomi George
